Work Experience

Senior User Interface & Experience Designer @ Vonken Brandtech Pvt. Ltd.

04/2022 - Present

R'Dash (YC Funded Startup)

At R-Dash, a cutting-edge construction management platform catering to developers, contractors, and design studios, I played a pivotal role as a Product Designer specializing in UI/UX in the journey of R'Dash from scratch. I was responsible for creating seamless and intuitive user experiences that facilitated complete workflow automation for professionals involved in construction and interior projects management.

I worked closely with cross-functional teams to develop a collaborative platform that brought together all stakeholders involved in construction projects. From surveys and designs to bill of quantities (BOQs) and vendor allocation, R-Dash provided a single platform for streamlined collaboration.

User Interface & Experience Designer @ WebIQ Technologies Pvt. Ltd.

06/2016 - 04/2022

RankWatch

Working as a lead designer for SAAS Product called rankwatch.com RankWatch is a cloud-based Internet Marketing Platform, which has Artificial Intelligence of its own. We help Website Owners and SEO Agencies to pinpoint the key areas where a website is losing traffic and areas where it can gain traffic by tracking areas such as Rankings, Backlinks, Analytics, Competitors etc and then analyzing and providing them Intelligent Data to work with, which in turn increases revenue. My role is implementing and developing User Interface and User Interaction Design Standards.

Websignals

WebSignals is a catalyst to monitor the Web. It allows Brands and Agencies to increase awareness of their brand, research the market, find sales opportunities and hawk-eye competitors. WebSignals is for monitoring what people are saying about us and our competitors on the web, news sites, blogs, forums, podcasts, social media. I was started working on webSignals in 2018 from scratch developing a prototype for the final product in terms of design.

As a Freelancer

2020

Knovelo App (Readers Community)

Knovelo is a plethora of books & connections, bridging the gap between the unanimous world of books & people by providing them access to read & share. Konvelo is a platform for everyone & anyone who likes to read, be it an avid reader, a new reader, or a non-reader. Also provide a platform for the authors to market their new launches, discuss their success stories and connect with the readers. Was created this platform from ideation and started from scratch to the final product.

Locatr (Grocery Navigation App)

LocatR is an app that gives real-time information about the availability of products and services on a map. my role here was developing user interface and experience and pointing pain points of customers.

Kockpit

Kockpit is a pre-designed BI dashboard for key persons of an Organization by syndicating data from Sales & Distribution, Finance, Inventory and Production modules of ERP system for various areas of Analysis viz. Revenue and Gross Margin, Accounts Receivables and Payables, Stock Ageing and Open Orders. I have created dashboard elements and UI design Guidelines.
